Objective

Computer Science undergraduate with strong foundations in Data Structures, Operating Systems, and Computer Architecture, and hands-on experience building AI-driven and full-stack applications. Proficient in C, Java, and Python, with practical exposure to REST APIs, database systems, and modular software design. Passionate about writing efficient, scalable software and continuously strengthening core computer science fundamentals.

Education

Rajiv Gandhi University of Knowledge Technologies 2023 – 2027
Bachleor of Technology-Computer Science Kadapa,AP, India
CGPA:9.17

Rajiv Gandhi University Of Knowledge Technologies 2021 – 2023
Pre University Course-M.P.C Kadapa,AP, India
CGPA:10.0

Nargajuna Model School 2020 – 2021
Secondary School Of Certificate Kadapa,Ap, India
CGPA:10.0

Skills

Programming & Core CS: C | C++(learning) | Java | Python | Data Structures & Algorithms | OOP | Operating Systems | Computer Architecture | DBMS | Linux Basics | Git

AI / ML: LLM Integration | Prompt Engineering | Resume Parsing & Skill Extraction | REST API-based AI Systems

Web Development: React.js | Node.js | Express.js | MongoDB | RESTful APIs

Projects

Career Compass | AI-Driven Career Guidance Platform

Github-link

- Developed a full-stack career guidance platform that generates ATS compliant resumes, extracts job specific skills, and provides role-based learning roadmaps.

- Built using React, Node.js, Express.js, and MongoDB, integrating AI-powered skill extraction and analysis from resumes and job descriptions using Gemini 2.5 Flash.
- Implemented a modular, end-to-end architecture to generate text-based ATS-friendly PDF resumes and analyze roles, tools, experience levels, and soft skills.

Edemy - Online Learning Platform

Github-link

- Developed a full-stack online learning platform enabling students to browse and enroll in courses and instructors to upload and manage content.
- Built using React, Bootstrap, Node.js, Express.js, MongoDB, and RESTful APIs, implementing authentication, role based access control, and Stripe-based secure payments.
