Professional Summary

AI-focused Full Stack Developer with hands-on experience building production-style RAG systems, document intelligence pipelines, and AI-powered web applications using Python, React.js, Node.js, MongoDB, and modern LLM workflows. Skilled in designing scalable backend architectures, vector search pipelines, API integrations, and retrieval optimization. Passionate about solving real-world engineering problems, learning rapidly, and contributing to high-impact AI products in fast-paced startup environments.

Education

Rajiv Gandhi University of Knowledge Technologies(IIT RKVALLEY)

2023 – 2027

Bachelor of Technology-Computer Science-CGPA:9.13

Kadapa, AP, India

Skills

AI/ML: RAG Pipelines, LLM Integration, Prompt Engineering, Embeddings, Vector Search, Vector Databases (Qdrant)

Web: HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, SQL

Programming: Python, C, C++, DSA

Tools: Git, Visual Studio Code (VS Code), Vercel

Projects

AI Brain | Document Intelligence System

Tech: Python, LangChain, Gemini 2.5 Flash, Qdrant, Nomic Embeddings, Unstructured API, React, Node.js, Express.js, MongoDB [Github](#) 

- Engineered a scalable RAG-based Document Intelligence System for PDFs, research papers, and images using **embeddings, chunking, and vector indexing pipelines**
- Built **Python-based microservices** for automated RAG evaluation using **RAGAS metrics**, improving retrieval relevance by ~40% through **hybrid search (semantic + keyword)**
- Optimized embedding pipelines with **batch processing**.
- Developed **session-based conversational memory, multi-user chat history tracking**, and scalable backend workflows for **context-aware AI applications**

Career Compass | AI-Driven Career Guidance Platform

Tech : React , Node.js, Express.js, and MongoDB, Gemini 2.5 Flash

[Github](#) 

- Built an AI-powered platform to generate **ATS-optimized resumes** and personalized skill roadmaps
- Developed a resume-JD matching engine with confidence scoring and skill-gap analysis.
- Designed **context-aware recommendation system** to identify skill gaps suggest learning paths
- Reduced LLM cost by ~30% by optimizing **Gemini API usage** and prompt efficiency
